

January 11, 2012

Kathy Purvis became a USANA associate in October of 2011. One of her concerns was that she wanted her own product experience as she began to market the products in earnest. The results below speak for themselves. Needless to say, Kathy is now fully on-board with the Sensé products, as well as the rest of the USANA products. A picture is worth a thousand words. [Compare Kathy's face with the descriptions of benefits from the 8-week trial below.](#)

This is from the website about the Sensé products, www.beautifulscience.com

From Kathy:

The before picture was taken Dec. 10, 2011. The after picture was taken January 6, 2012. The pictures were made at the same place, same time and with the same flash lighting.

December 11, 2011, I began using facial products from USANA. The products were Sense' gentle daily cleanser, hydrating toner, perfecting essence and a moisturizer - daytime protective emulsion or night renewal crème.

I used these products at least once a day but most of the time twice a day.
